Your Comments:

Dear EPA representatives,

I respect the work of the EPA immensely, thank you for all of your advocacy for our natural resources. The Proposed Clean-up Plan for the Portland Harbor Superfund Site troubles me. I was hoping that in becoming a superfund site that meant that we could clean up the area in a way that would make the water safe for everyone. With the current plan of "wait and see if the small amount of contaminate removal is enough" does not seem to be a proper clean up. I would like to see a river that can have healthy fish. Being one of the largest rivers in Oregon, is a tragedy that just south of the mouth of the river is so polluted that the many people who live here cannot safely eat that fish, not forgetting the health of the fish themselves. I urge you to redraft a plan that removes more contaminants and goes further to help sustain our fish population. Thank you, (b) (6)
